## AIR BARRIER & INSULATION COST ANALYSIS WORKSHEET

### Standard Systems

Air barrier labor and material cost \_\_\_\_\_

Insulation and installation cost \_\_\_\_\_

Total Cost \_\_\_\_\_

**Caviseal** Insulation and Air barrier \_\_\_\_\_

?? Savings \_\_\_\_\_

Even if the cost were more we know our product out performs standard air barrier insulation systems. Caviseal is totally bonded to the sub straight and therefore no air infiltration can get behind the insulation.

Typically air barriers are running from \$2.00 to \$2.50 per sqft . Insulation for 2” of ridge board is around 60 cents a square foot and labor is around 50 cents a square foot. We have seen a average total cost for the system at around \$3.50 a square foot. With Caviseal running around \$2.50 you should save around a \$1.00 a square foot.

Canada has proven this product for over 30 years.
