Core Foam Masonry Foam Insulation A Safer and Healthier Foam

Core Foam Masonry Foam Insulation contains the **lowest levels of formaldehyde** of any amino-plast foam insulation for commercial block on the market today. Contrary to other "dry" foam manufacturer claims . . . **Core Foam Masonry Foam Insulation meets government formaldehyde standards.**

Testing conducted by an independent, certified laboratory shows that Core Foam Masonry Foam Insulation . . .

- ♦ Contains up to **6 times less formaldehyde than a competitive "dry" foam resin** (0.5% versus 3.0%).
- ♦ Contains up to **20 times less formaldehyde than a competitor's foam produced with "premixed" resin** (2,700 ppm vs. 52,500 ppm).
- ♦ Once cured, **emits formaldehyde below detectable limits** (less than 0.8 ppm over a 24-hour period at 75° F).
- ♦ **Complies with OSHA guidelines.**
